Charles T. Tart, Ph.D.

INSTRUCTIONS FOR CONTRIBUTORS TO DISSOCIATION: PROGRESS IN THE DISSOCIATIVE DISORDERS

DISSOCIATION has established guidelines consistent with the *Publication Manual of the American Psychological Association, Third Edition, 1983*. For more refined questions of usage and grammar, *DISSOCIATION* relies upon *The Chicago Manual of Style, Thirteenth Edition, 1982*.

Please submit four complete and clearly legible double-spaced typewritten sets of the entire manuscript. If the manuscript is computer-generated, please also submit manuscripts in one of the following manners:

- 1) **Apple Macintosh 3.5" floppy disk.** Compatible word processing programs are *Word* or *MacWrite*. Also include four hard copy sets for reference.
- 2) **IBM MS-DOS floppy disk.** Compatible word processing program is *Word Perfect*. If you use an MS-DOS program other than *Word Perfect*, also save file as an ASCII or text-only file. Also include four hard copy sets for reference.

The title page, abstract, reference list, footnotes, tables, and figures must be clearly labeled and on separate pages. Please do not place author identifications anywhere besides the title page. Last minute copy corrections need to be made with a "non-repro" blue pen or pencil. Leave a single space after end-of-sentence periods. Mail disks and hard copy manuscripts to: **Richard P. Kluft, M.D., 111 N. 49th Street, Philadelphia, PA 19139.**

All authors must sign a letter assigning the copyright ownership of the article to DISSOCIATIVE DISORDERS RESEARCH PUBLICATIONS LIMITED, contingent upon its acceptance.

The following guidelines apply to all submissions.

1. The title page should include the title of the article, the name(s) of the author(s), the academic or institutional affiliation of the author(s), the running head (or abbreviated title), and the name and address for reprints. Authors without academic or institutional affiliations should list instead the city and state in which they practice.
2. The abstract should be a brief summary of the article. It should be accurate, succinct, quickly comprehensible, and informative. It must not exceed 150 words.
3. The text should introduce the article's purpose and include a brief review of the relevant literature, describe its methods and subjects, indicate its results, and offer a discussion in which its conclusions are stated. An author who would like to submit an article (other than a case study) that differs considerably from this structure should contact the Editor-in-Chief to discuss the proposed submission. The text may require several levels of headings. All should be typed in upper and lower case letters (e.g., *The Neuropsychophysiology of Dissociations*). The first level of headings should be centered, but not underlined. The second level should begin at the left margin and be underlined. The third level should be indented from the left margin and underlined. For more complex sub-heading formats, consult the *Publication Manual of the American Psychological Association*.
4. References within the text should be made in the author-date format. Use the names of either one or two authors on each occasion. When there are more than two authors, use all in the first citations, and the surname of the first author followed by "et al." subsequently. When there are six or more authors, use the surname of the first author followed by "et al." on all occasions. For citations in parentheses, use an ampersand (&) before the name of the last author listed. All quotations cited must include page numbers.
5. References within the reference list are restricted to those cited in the text. They should be listed in alphabetical order on a separate page, headed *References*. The authors' names are given surname first, followed by the initials. Place an ampersand (&) before the last author's name. The names are followed by the publication date in parentheses, followed by a period. The title (and the volume number, when relevant) is italicized (underlined, if italics unavailable), then list the page numbers. Use "pp." before the page numbers of publications other than scientific journal articles.
6. Sample references: (The italicized words should be underlined in submitted manuscripts.)

Book

Ellenberger, H.F. (1970). *The discovery of the unconscious*. New York: Basic Books.

Article

*The Ridgeview Center
for Dissociative Disorders
Announces
An Expansion of
Our Inpatient Program*

Since 1987 Ridgeview Institute has been an innovative leader in the rapidly growing specialty area of dissociative disorders. Conveniently located in metro Atlanta, Ridgeview serves as both a regional and national center for treatment of the full range of dissociative syndromes, including those linked to childhood histories of emotional, physical and sexual abuse. The Ridgeview Center for Dissociative Disorders also specializes in the treatment of severe character disorders with a dissociative component.

Recently expanding to a 20-bed, still fully self-contained unit, Ridgeview remains the largest full-service specialty program of its kind. Today more than 25 experienced Ridgeview clinicians serve as attending physicians and primary therapists for our program, assuring a prompt response to consultation and referral inquiries from throughout the country.

▲ EMPHASIZING RECOVERY WITH DIGNITY, the Ridgeview treatment model balances the benefits of the more traditional psychiatric milieu with the value of modalities designed specifically for the needs of the dissociative disorder patient. Individual psychotherapy is combined with group, art, music, activity and recreation therapies in a specialized milieu. Nursing, social services and expressive therapy staff are trained and experienced in working intensively with patients demonstrating the entire spectrum of dissociative disorders, including multiple personality and post-traumatic stress disorders with a dissociative component.

▲ AS A TERTIARY FACILITY, Ridgeview has made a special commitment to the more intensive modalities required for many dissociative patients previously considered refractory to treatment in other settings. Our highly specialized inpatient program permits patients to advance at a safe and healthy pace to the least restrictive level of care appropriate to their clinical needs. The program is suited for both brief and longer term treatment objectives, with carefully individualized treatment plans.

▲ PROVIDING MAINSTREAM SUPPORT FOR RESEARCH AND EDUCATION IN THE FIELD, Ridgeview publishes *DISSOCIATION* and provides funding for the official newsletter of the International Society for the Study of Multiple Personality and Dissociation.

For more information or patient referral to the Ridgeview Center for Dissociative Disorders, contact Information & Referral Services at 1(800) 345-9885 or (404) 434-4567.

INTERNATIONAL SOCIETY FOR THE STUDY OF MULTIPLE PERSONALITY & DISSOCIATION

The International Society for the Study of Multiple Personality and Dissociation invites you to join us as we define and improve our understanding of the field of dissociation, including multiple personality/dissociative states research, diagnosis and treatment.

ISSMP&D brings together professionals dedicated to the search for answers to improve the quality of life for all patients with multiple personality disorder and other dissociative states.

Together we can and do make a difference!

Should you have any questions regarding membership in ISSMP&D please contact the national office at (708) 966-4322.

Vol. III, No. 4: December 1990

Application for Membership

Name and Title _____

Academic Degrees _____

Address _____

City/State/Zip _____

Country _____

Phone (work) _____

Phone (home) _____

Occupation _____

Professional Speciality _____

Please check membership category:
