

Spring 2022 OIMB Seminar Series
Oregon Institute of Marine Biology
Charleston, Oregon
Boathouse Auditorium, Fridays at 4:00pm
***Indicates Public Lecture held at 7:00pm

- April 1 – **George von Dassow**, OIMB, University of Oregon
"Revenge of the ciliated blobs: carnivory by larval nemerteans, polyclads, and annelids"
- April 8 – **David Cade**, Stanford University
"Limitations on gigantism: bulk exploitation of patchy prey by rorqual whales"
- April 15 – **Rodrigo Beas**, Autonomous University of Baja California
"Baja California temperate reefs as sentinels for climate change"
- April 22 – **Shon Schooler**, Oregon Department of State Lands
"Ecology and management of invasive green crabs"
- April 29 – **Clemens Cabernard**, University of Washington
"The cell and mechanobiology of asymmetric cell division"
- May 6 – **Lynne Quarmby**, Simon Fraser University
Public Lecture at 7pm
"Watermelon Snow: Science & Stories"
- May 13 – **Svetlana Maslakova**, OIMB, University of Oregon
"DNA-barcoding larvae significantly increases estimates of marine biodiversity"
- May 20 – **Laurel Hiebert**, UC Santa Barbara
"On the origins of clonality, dormancy, and whole-body regeneration in tunicates"
- May 27 – **Lauren Ponisio**, University of Oregon
"Resources pulses and species traits shape the micro-and patho-biomes of pollinators"
- June 3 – **Caitlin Plowman & Lauren Rice**, OIMB, University of Oregon "Adventures at sea: Tales from a recent expedition to hydrothermal vents in the South Pacific"
